**NAV REITs Post a Cumulative 70% Total Return Over Past 5 Years
Outpacing the Return of Public Market Indices Over Same Period
With Less Volatility**

Strong Performance Propelled First Quarter Fundraising to \$12 Billion

Shrewsbury, New Jersey, April 27, 2022 – Net Asset Value (“NAV”) REITs posted a strong 4.94% return for first quarter 2022 as measured by the Stanger NAV REIT Total Return Index. The Stanger NAV REIT Index, which took only a moderate dip in first quarter 2020, has since continued on a steady rise. NAV REIT returns have outpaced those of their traded counterparts with a cumulative total return of 70.1% over the last 60 months. The momentum of the MSCI US REIT Index Gross Total Return (RMS G), which rose 16.32% in the fourth quarter on a strong stock market, fell 4.06% in the first quarter. Over the last 60 months, the total return of this broader REIT market index was 58.5%.

The graph below illustrates the significant impact that stock market volatility plays in listed REIT securities values relative to non-listed REITs. “This performance highlights the benefits of a non-listed NAV REIT vehicle, that historically has provided a mostly steady real estate-based return without the extreme ongoing volatility of the traded market,” according to Kevin T. Gannon, Chairman & CEO of Stanger. “This strong performance is the driving force behind \$12.1 billion of NAV REIT fundraising in first quarter 2022, and we expect this trend to continue.”

These results, as well as individual performance data on 38 non-listed REITs with a combined market capitalization of over \$101 billion, are published in the newly released Spring 2022 issue of the IPA/Stanger Monitor. This individual performance data reveals Cottonwood Communities

– Class A (102.18%) and Resource REIT (67.12%) to be the top performing NAV REIT and Lifecycle REIT, respectively, over the last 12 months. Over the 5-year period, Blackstone Real Estate Income Trust – Class I (14.30% - annualized) was the top performing NAV REIT and Resource REIT (15.33% - annualized) was the top performing Lifecycle REIT.

The IPA/Stanger Monitor also covers 11 non-listed business development companies, with a combined market capitalization of \$20 billion. The IPA/Stanger Monitor is sponsored by the Institute for Portfolio Alternatives (“IPA”) and authored and published by Robert A. Stanger & Co., Inc.

“Our latest data substantiates what wealthy and institutional investors have known for years, that NAV REITs deliver strong returns with less volatility risk, improving a portfolio’s overall performance,” said Gannon. “Main Street investors and America’s retirement savers need access to those same benefits. It’s time we remove the artificial barriers that are preventing that type of broad access to portfolio diversifying investments, like NAV REITs, and equip those investors with practical guidance on how to utilize these products as part of a balanced portfolio.”

The Stanger NAV REIT and Stanger Lifecycle REIT Total Return Indices measure the performance of non-listed REITs on a quarterly basis. Stanger began calculating the indices on December 31, 2015, with a base level of 100. All NAV REITs with a minimum of one calendar quarter of performance are included in the NAV REIT Index. Lifecycle REITs are added to the Lifecycle REIT Index in the quarter that their first NAV is announced. Lifecycle REITs are removed from the index upon listing, merger, or in the case of a liquidation by sale of properties, upon conversion to a liquidation basis of accounting. The indices currently include 17 NAV REITs with a total of 90 separate share classes, and 25 Lifecycle REITs with a total of 44 separate share classes.
